EDUCATION

University of Perpetual Help System JONELTA

June 2025

Bachelor of Science in Computer Engineering

WORK EXPERIENCE

TDK Philippines Corporation

August 2025 – Present

Associate Technician

- Developed a Python and SQLite-based Lot Tracking System to simulate BMS production processes and prepare the department for Mass Production, enabling end-to-end product traceability across manufacturing cycles.
- Designed and developed 3D mechanical components for a Metal Bar Wall Scanning System using Autodesk Inventor, enabling accurate sensor positioning and supporting customer demonstrations of Bio Magnetic Sensor performance.
- Designed and developed custom assembly jigs using Autodesk Inventor, utilizing Creality 3D printing for fabrication to improve efficiency and consistency during BMS assembly processes.

INTERNSHIP

Wally Wombats LLC.

May 2024 – July 2024

Game Developer
Nevada

3165 N Rainbow Blvd, Las Vegas,

- Developed a 2D educational coloring game in Unity targeting children, featuring interactive levels and creative customization of characters like Wally the Wombat.
- Designed and implemented interactive coloring mechanics, intuitive drag-and-drop controls, and child-friendly UI using Unity 2D tools and C# scripting.
- Packaged and deployed the game build with a clean UI and custom assets for showcase, demo day, and online publishing.

CAPSTONE PROJECT

Toothbrush Accessory using Deep Learning and Gemini for Brushing
2025 Monitoring, Plaque and Decay Detection

August 2024 - May

- Designed and developed the embedded system for the smart toothbrush accessory, integrating MPU 6050 sensor and Raspberry Pi camera module to collect brushing movement and oral image data.
- Developed a responsive web dashboard using HTML, CSS, and JavaScript to display brushing activity, plaque detection results, and personalized feedback.

INTEREST

System Development • IT Support & Troubleshooting • IoT & Embedded Systems • AI Integration & Automation • 3D CAD Modeling & Design
